Hi Nimrod
That's another Company which asked me to come and see them.
Have you heard of them?
Best
EB

> Cortica is an Israeli company with the world leading image recognition & visual understanding technology protected by over 100 patents. Cortica has developed a Visual Search platform for Web and Mobile, tested and vetted by multiple leading players, e.g. Intel, Samsung, Sony, Qihoo. Cortica's platform was deployed on a large-scale and currently supports millions of users. Cortica uses image-recognition techniques modeled after how the human brain processes images. It goes beyond traditional approaches, such as fingerprinting and deep learning, enabling large-scale fine-grained recognition of products, brands, scenes, food and other fuzzy concepts.
>
> Cortica's mission is to be the leader of the Visual Search emerging market. The company is currently in a hyper-growth phase, scaling it's strategic partnerships in US and Asia, and launching its consumer platform. Cortica attracts the best-in-class researchers and engineers in Israel. The company has headquarters in NYC and an operational site in China.

The company is in the process of fundraising to support its hyper growth (>$100m round).
